

# G DATA ANTIVIRUS BUSINESS

## VIRUS-FREE CLIENTS – FOR A TROUBLE-FREE AND PRODUCTIVE WORKING ENVIRONMENT

G DATA Antivirus Business protects your company network using proven, multiple award-winning antivirus technology, central management and automatic protection for all servers, workstations, notebooks, iOS and mobile Android devices.

The optional Network Monitoring module helps you keep track of your complete infrastructure – from printers to servers. Using the Patch Management module you can make sure that the third party software on your clients is up-to-date at all times.

With the new Antivirus Business version 14.0 you can now also manage your Mac clients centrally using G DATA Administrator and take advantage of the integrated Exploit Protection, which protects your computers against vulnerabilities in installed software.

The image displays two screenshots of the G DATA Administrator software interface. The top screenshot shows the 'Dashboard' with a 'G Data Security Status' section containing a list of protection modules and their status (e.g., Virus signatures: 96/98, Monitor: 96/98). A pie chart indicates the status of client connections, with a legend for '<= 24 hours' (green) and '<= 3 days' (yellow). Below this is a 'Top 10 clients - Neutralized infections (2/5/2016-2/19/2016)' bar chart. The bottom screenshot shows a detailed table of client status.

Client	Security status	Engine A	Engine B	Status as per	G Data Security Client version	Last access
WORKSTATION01	No connection to server	AVA 25.5563 (17.02.2016)	GD 25.6381 (17.02.2016)	2/17/2016 11:54:00 AM	14.0.0.436 (08.12.2015)	2/17/2016 11:54:00

SIMPLY  
SECURE

## COMPREHENSIVE CLIENT PROTECTION

<b>CloseGap hybrid technology</b>	Maximum protection through proactive, signature-based detection
<b>G DATA BankGuard</b>	Secure online payments – no browser add-on or additional software required
<b>Behavior Blocker</b>	Protects against even unknown viruses
<b>NEW! Protection against vulnerabilities in installed software</b>	Exploit Protection reliably protects your clients against vulnerabilities in installed programs – from text editors to browser plug-ins
<b>Protection against harmful USB devices</b>	The integrated USB Keyboard Guard reliably protects clients against harmful USB devices masquerading as keyboards
<b>IMPROVED! Antivirus for Linux clients</b>	Protects Linux computers in the company network against Internet threats. Now with support for even more distributions
<b>NEW! Centrally managed antivirus for Mac clients</b>	Manage Apple computers in your network comfortably using G DATA Administrator

## CENTRAL ADMINISTRATION

<b>IMPROVED! Simple administration</b>	Central management of installations, virus scans and user permissions
<b>Clear dashboard</b>	User-friendly overview of all relevant information, including context-based help
<b>Remote administration</b>	From anywhere via web interface – even from mobile browsers
<b>Active Directory integration</b>	Transfer existing group structures and automate client installation
<b>Mobile Device Management</b>	Central administration of mobile Android and iOS devices, with antitheft protection, app checking, corporate phone book, call filter and much more (features can differ depending on the system)
<b>Software and hardware directory</b>	Detailed display of the entire inventory
<b>Support free of charge 24/7/365</b>	Development and in-house support work closely together to help you as fast as possible

## OPTIONAL MODULES

<b>NEW! Network Monitoring</b>	Monitor your complete infrastructure, from printers to servers, using individually customizable metrics
<b>Patch Management</b>	Centrally controlled software updates for all clients in the network
<b>Premium service and support</b>	Guaranteed response times and highly specialized support contacts – offer available on request
<b>NEW! Exchange Mail Security</b>	Take advantage of virus protection and AntiSpam for your Microsoft Exchange Server (2007 through 2016)
<b>NEW! Linux Mail Security Gateway</b>	Add virus protection and AntiSpam to your Postfix- and Sendmail-based Linux Mail Server
<b>NEW! Linux Web Security Gateway</b>	Extend your Squid-based Web Gateway with comprehensive protection against viruses and phishing
